

# Who cares?

Wahig-Inabanga  
Watershed

SouthEast Asia  
Philippines

Mean annual  
Rainfall: ~2,000

## Beneficiaries of Ecosystem Services

Smallholder farmers of Bohol as beneficiaries of Ecosystem Services

Ecosystem services are essential to smallholder farmers' tree role appreciation of lowland communities. These communities could be more receptive with ecosystem service-based adaptation and land use planning/development.

Local Government Agencies of Bohol as beneficiaries of Ecosystem Services

Proposed environmental plans and land-use development for the province include development of sustainable agriculture and ecotourism, conservation of national parks and forest reserves. These proposed plans help improve government income from tourism industry.

Tourism and businesses of Bohol and Wahig-Inabanga Watershed

Foreign and local tourists often come to Bohol to experience the exceptional beauty of nature and the environment of the Bohol. Aesthetic value and cultural value of environment have improved household income of local island citizens, which according to statistics is the highest income in the region.
