

# UNEA-6

You are cordially invited to a  
Roundtable Luncheon:

## Bringing Nature and Food into UNEA and National Policy

**29 February 2024** | 12:30 - 14:00

UN Campus - Recreation Centre  
Nairobi, Kenya

Directions to the venue can be found in the event's concept note

### Background

The Roundtable Luncheon will explore the question of how global agreements can be translated to national level implementation and what role UNEA Resolutions can play into this context. For example linking Land Degradation Neutrality targets, Ecosystem Restoration targets, Nationally Determined Contributions (NDCs), Global Biodiversity Framework, and Agricultural Strategies to scale implementation on the ground. Food system transformation and land restoration are key to harmonising action between the Rio conventions to achieve climate, biodiversity and land targets.

This event will place special focus on integrating soil health and food systems to strengthen Nationally Determined Contributions (NDCs), National Biodiversity Strategies and Action Plans (NBSAPs), and National Adaptation Plans (NAPs).

### Objectives:

- Showcase ongoing efforts to link food systems, policy and soil health in NDCs, UNEA Resolutions and upcoming UNCBD, UNCCD, and UNFCCC CoPs
- Identify how global agreements can be translated to national level implementation
- Garner further support for wider recognition of the critical role of soil health in international negotiations

**Please RSVP here** by the 23rd of February
